EXPERIENCE

Spring Health / *Software Engineer I*

AUG 2024 - PRESENT

Technologies used: React, TypeScript, Ruby on Rails, GraphQL, Python

- Added notifications and a noise filter to a video communications tool, contributing to a project that helped save an estimated \$90,000 per month
- Crafted and upgraded 12 components for the component library and a front-end repository, solving accessibility errors across 10+ webpages and streamlining other developers' work
- Created a tool that mapped 5,000+ user events to descriptions of those events, aiding cross-functional collaboration in user flow analysis
- Led rebranding effort to get more members into self-care routines
- Led the deprecation and elimination of out-of-date A/B experiments
- Migrated Neurodiversity page onto updated front-end foundation, making it easier to maintain
- Built an internal tool that mapped component dependencies and logged metadata that enabled multiple teams to track engineer responsibility for given files
- Created a mood tracker calendar that pulled and sent user mood data to the back-end and displayed it in a one-week and two-week view
- Added Gujarati and Telugu languages to the platform
- Audited and corrected crisis response phone numbers for international users
- Utilized ABAC to route the user to coaching or therapy conditional on their contract and cohort

Spring Health / *Software Engineer Intern*

JUN 2024 - AUG 2024

Technologies used: React, TypeScript, Ruby on Rails

- Implemented logging for 90 events to streamline troubleshooting when users encountered errors
- Fixed 15 accessibility errors to improve the experience of users utilizing screen readers
- Identified and wrote tickets for 20+ bugs, helping to solve accessibility and UI errors

EDUCATION

Rutgers University / *School of Arts & Sciences*

SEP 2021 - JAN 2025

- Bachelor of Arts *summa cum laude* in Computer Science; minors in American Studies and Political Science

PROJECTS

Rutgers RUMobile / *Software Engineer*

[App Store](#) (4.8 ☆)

Technologies used: React Native, React Native Testing Library

- Collaborated with developers and designers to serve 3,000+ users by building new features
- Built 20+ components to display food details and profiles, welcome users, and more
- Improved product quality by increasing test coverage by 12%

Online Course / *Udemy*

Skills: video recording, video editing, research, Photoshop

- Created the bestselling [Introduction to Political Science](#) course
- Produced 5 hours of course material to engage 1,200+ students
